

The graph displays a time series of consumption volume. The x-axis represents time, with labels '04-12' at the beginning and end. The y-axis represents consumption volume in liters. The data is shown as a red line with several sharp, vertical spikes. The most prominent spike is located in the middle of the timeline, reaching the highest value on the y-axis. Other smaller spikes are visible at various points throughout the period.

04-13
