

Chromatogram showing consumption of VolumeMedia [L] over time. The x-axis represents time in minutes, ranging from 0 to 120. The y-axis represents consumption in liters, ranging from 0 to 10. The chromatogram shows a baseline at 0 L with several sharp peaks. The first major peak occurs around 25 minutes, reaching approximately 8 L. A second, smaller peak occurs around 75 minutes, reaching approximately 2 L. A third, very sharp peak occurs around 115 minutes, reaching approximately 10 L. The legend indicates the data is for 'consumption: VolumeMedia [L]'.
