

Chromatogram showing consumption of VolumeMedia [L] over time. The x-axis represents time from 00:31 to 09:03. The y-axis represents consumption volume. A red line shows the consumption profile, which is mostly flat at zero with several sharp peaks. The highest peak occurs around 06:00, reaching approximately 1.0 L. Other significant peaks are around 05:00 and 07:00.
