

The chromatogram displays detector response over a 100-minute period. The x-axis, 'Time [min]', is marked from 0 to 100 in increments of 10. The y-axis, 'Response', is marked from 0 to 100 in increments of 20. A legend at the top identifies the red line as '{consumption: 'VolumeMedia [L]'}'. The baseline is stable at a response of approximately 5. Significant peaks are observed at the following approximate retention times:

Retention Time [min]	Approximate Response
24	15
25	85
26	100
27	15
28	10
75	65
76	10
80	15
81	80
82	65
85	10
86	15
87	10
88	15
89	10
95	100
