

The graph displays the consumption of media volume over time. The x-axis is labeled with time in HH:MM format, ranging from 02:22 to 03:23. The y-axis represents the consumption volume in liters (L). The data shows a series of sharp, narrow peaks, indicating discrete consumption events. The highest peak is approximately 1.0 L, occurring around 02:50. Other significant peaks are around 0.8 L, 0.6 L, and 0.4 L. The baseline consumption is 0 L.
