

Emissioni del pattern CEMHLH2B

Chromatogram showing consumption of VolumeMedia [L] over time. The x-axis represents time in minutes, ranging from 0 to 100. The y-axis represents consumption in liters, ranging from 0 to 1.0. A single sharp peak is visible at approximately 65 minutes, reaching a consumption of about 1.0 L. The baseline is stable at 0 L throughout the run.
