

The graph displays consumption volume over time. The x-axis represents time with a 1-hour interval. The y-axis represents consumption volume. The graph shows a red line with several sharp peaks. The highest peak is at 10:00, reaching approximately 100 L. Other significant peaks are at 11:00 (approx. 60 L), 14:00 (approx. 40 L), and 15:00 (approx. 30 L). The legend indicates the data is for 'consumption': 'VolumeMedia [L]'.
