

The graph displays consumption volume over time. The x-axis is labeled with time intervals from 10:15 to 16:15. The y-axis represents consumption volume in liters (L). The data is shown as a red line with several sharp vertical spikes. The highest spike is around 14:15, reaching approximately 100 L. Other spikes are visible around 11:15, 12:15, 13:15, and 15:15.
