

The graph displays consumption volume over time. The x-axis represents time from 0 to 100, and the y-axis represents consumption volume from 0 to 100. The data series, labeled {'consumption': 'VolumeMedia [L]'}, shows a series of sharp peaks, indicating consumption events. The highest peak is at time 50, reaching a volume of 100. Other significant peaks occur at times 30, 40, and 60, with volumes around 80, 90, and 70 respectively. The graph also shows several smaller peaks and troughs throughout the time period.
