

Chromatogram showing consumption of VolumeMedia [L] over time. The x-axis represents time from 07:26 to 07:37. The y-axis represents consumption volume. A red line shows the consumption profile, which is mostly flat at zero with several sharp peaks. The most prominent peak occurs at approximately 07:36:30, reaching a value of about 1.0 L. Other smaller peaks are visible around 07:26:30 and 07:36:00.
